

# PKSAFETY

STAY SAFE. LOOK GOOD

# ABOUT US

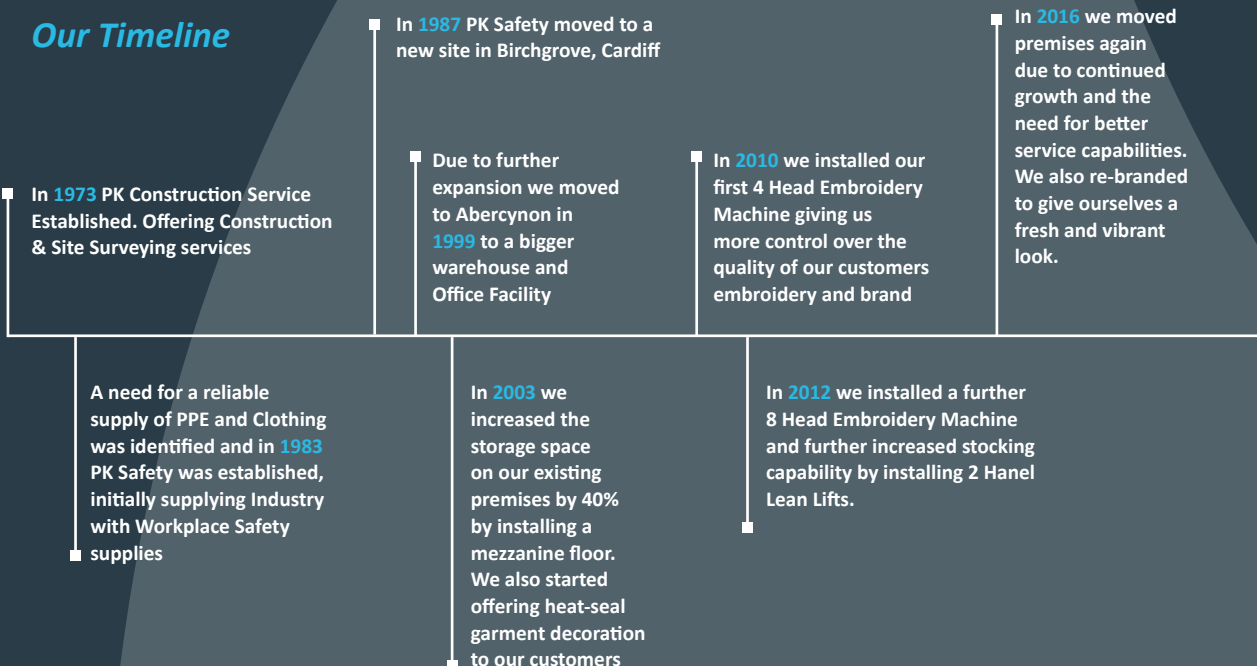

Our aim is to become the preferred supplier and advisor for PPE and clothing for industrial and service sectors.

This dream is built on our core values;

- **Professionalism;** We strive to continuously offer our clients a professional service. We believe that this is the foundation of becoming an advisor to any company. We build lasting relationships with our clients to fully understand their ongoing needs.
- **Trustworthiness;** We're always upfront and honest with our clients. If the safety wear you think you need won't do the job, we'll tell you! That's why you can always trust us as your PPE and Clothing advisor.
- **Dependability;** We deal with our clients face to face to fully understand their needs. It's this approach that allows us to find the right solution whilst working within their budget and deliver every time.
- **Passion;** We want you to find the right safety equipment, at a great price, delivered when and where you need it, that actually makes you look good too. We set our standards high and encourage our clients to do the same.

## Our Timeline

## WORKWEAR

We specialise in tailoring your workwear to your company needs. With garment decoration and bespoke items we'll help you portray an image which reflects your company.

05

## BUSINESS WEAR

We believe company image is vital. Whether you're in the office or visiting clients, our selection of corporate wear will give you the confidence and professional image your company deserves.

55

## FOOTWEAR

Discover quality safety footwear for any workplace. From our Gore-Tex Waterproof Safety Boot to the Lightyear Pioneer Safety Shoe we have a full range of safety footwear for any workplace, requirement or budget.

67

## GLOVES

We have a wide range of cut resistant, heat resistant, thermal, handling and disposable gloves which are suitable for all kinds of workplaces. Depending on the application, industry or hazard; we can offer solutions to protect you and your company.

77

## HEAD & FACE

Durability, comfort, safety, quality and innovation are hallmarks of every PK Safety product line. Protect your head and face with our range of specialised safety equipment.

89

## JANITORIAL

From cleaning products to handtowels, hygiene to hand care, here at PK Safety we have a vast range of janitorial supplies to help keep your business clean!

105

## WORKPLACE

It's not just workwear and PPE that is required to meet the safety standards of your business. Don't forget to stock up on essentials such as spill kits, first aid supplies, fire extinguishers and safety signs.

143

## ACCREDITATIONS

RISQS

UVDB  
Approved by Authorities

PK Safety hold the following accreditations for their services to their clients: 1. ISO 9001 2. ISO 14001 3. RISQS 4. UVDB  
These accreditations mean that PK Safety have a professionally recognised level of service and work hard to maintain our high levels of service to all the different industries and sectors we supply with protective clothing and equipment.

## PORTAL

A seamless and simple system for ordering equipment and clothing is what everyone wants. However due to the complexity of workwear it is often difficult to make the process completely painless! That is why we have developed an online ordering portal for our customers.

It allows customers to place and view orders remotely. It also gives customers the ability to order by site, location or department as well as the capability to limit certain users' spend and ordering frequency, giving you as a manager complete control with minimum hassle. Speak to us today to set up this portal and start ordering your PPE and Clothing the easy way!

## aPPE

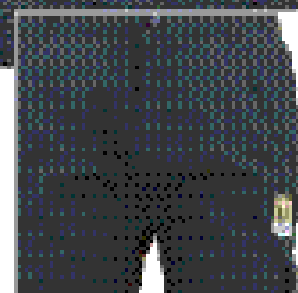

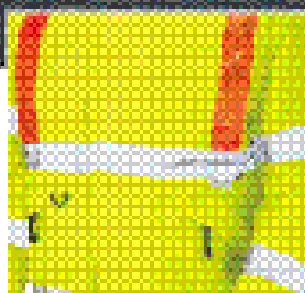

Selecting the right PPE for your specific application is a confusing and complex task. We've decided to make it simple, quick and easy to do this with a mobile App that allows you to input data around tasks being handled by operatives and then generates a range of different solutions for each different body part.

Search for our App now under aPPE App or get in touch with us to enquire about how to use it to its full advantage.

We specialise in tailoring your workwear to your company needs.  
With garment decoration and bespoke items we'll help you portray  
an image which reflects your company.

# EXPERIENCE THE RED CARPET TREATMENT FROM PK SAFETY!

At PK Safety we have a clothing division set aside to cater for your workwear and uniforms. Royal Corporate is dedicated to making the purchasing of workwear and uniforms a pleasurable and enjoyable experience for everyone concerned.

To do this we offer a wide range of products with outstanding service that's personal and friendly.

We understand that the ordering of uniforms for your company is a big decision whether you are ordering for the first time or whether it is a routine occurrence for you. So we aim to provide as wide a range as possible to cater for your every need. All this is provided with PK Safety's usual standards of friendliness and care. Ring up now to experience for yourself the **Red Carpet Treatment**.

Experience tells us that customers love The RED CARPET TREATMENT, so call our sales team and one of our Uniform Consultants will help you experience it for yourself NOW!

**01443 741999**

# INDIVIDUAL PACKING SERVICE

We offer an Individual Packing Service for customers who require clothing to be supplied individually for each person.

Everyone will get a personal package containing all the clothing that they require. We supply order forms with products, styles, colours and sizes for each person.

Every pack will arrive labeled individually, cutting out the inconvenience of sorting and distributing within your company.

At PK Safety we have our own garment embroidery and heat transfer machinery, enabling you to have your logo added to garments quickly and efficiently.

## EMBROIDERY

### WHY EMBROIDERY?

Embroidery is extremely durable and will normally out-last the garment itself. Embroidered garments can also be industrially laundered – making life easier for you.

If you don't already have a logo we will work with you to help you design your very own image!

There are three easy steps to PK Safety setting up your logo ready for garment decoration.

### 1. SUPPLY YOUR LOGO

You can either send us an electronic copy of your logo or we can take it from your letterhead or business card.

### 2. APPROVE YOUR SAMPLE

We will send you a sample of your embroidered logo for your approval.

### 3. CHOOSE YOUR CLOTHING

Once you're happy with your choice of clothing and the positioning of your logo, we will process your order and deliver direct to you.

## HEAT TRANSFER

### WHY HEAT TRANSFER?

Heat transferring is extremely economical if you are ordering a large logo. It is excellent on waterproof garments and Hi-Vis clothing – which makes identifying personnel on site a lot easier.

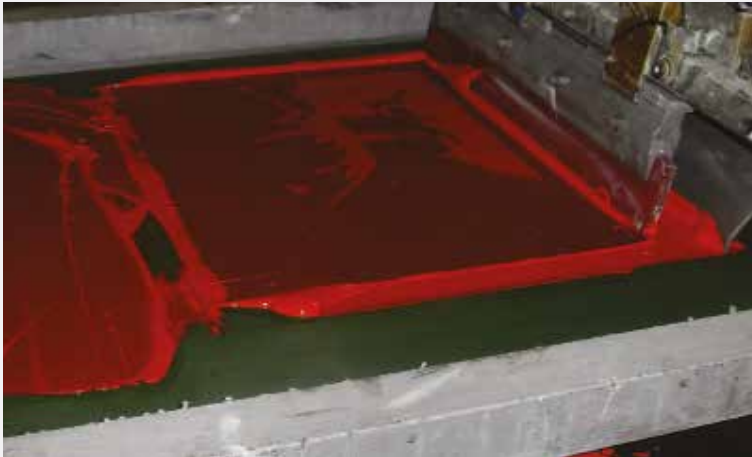

If you don't already have a logo we will work with you to help you design your very own image.

**It's not  
just logos –  
we can apply  
names or  
messages too!**

## SCREEN PRINTING

### WHY SCREEN PRINTING?

Screen printing is the ideal garment print for large quantities, especially in single colour.

This type of printing will last as long as the garment.

## BESPOKE CLOTHING

We work with garment manufacturers around the world to offer you Bespoke Clothing helping you show your true style and the professionalism of your organisation.

The bespoke range from PK Safety is the easy way to show your colours. Simply call our sales team on **01443 741 999** to discuss your requirements and we will do the rest.

### BESPOKE BUSINESSWEAR

You can choose almost everything, from the fabric, the colours, the design and what labels go in them. Giving you the chance to create an image that is yours, from as little as 250 garments.

FOR ESD PROTECTIVE FOOTWEAR GO TO PAGE 75

The PK Safety range of coveralls are designed to protect workers from a range of hazardous substances, products and processes. They are typically used in situations where cleanliness and hygiene are critical for protection from fine particles, liquid splashes or fine spray providing a physical, throw away barrier that is cost effective and doesn't require decontamination.

PK Safety coveralls meet the applicable European Standards for Chemical protective Clothing, Category III.

## TYPES

### TYPE 4

Spray-tight clothing. Barrier to saturation and spray of liquids (EN 14605 and 468)

### TYPE 5

Particle-tight clothing. Barrier to hazardous airborne particle materials and dust (EN 13982-1)

### TYPE 6

Limited splash-tight clothing. Barrier to limited splash and liquid spray (EN 13034).

### EN 1149.1

Anti-static. Anti-statically treated and offering electrostatic protection according to EN 1149-1.

## ESD EXPLANATION

### 1. ESD Terms

#### ESD

##### Electrostatic Discharge

Electrostatic Discharge caused by an imbalance of potential on charged objects or persons by contact or close proximity.

#### ESDS

##### Electrostatic Discharge Sensitive Device

#### EPA

##### Electrostatic Protected Area

Area equipped with ESD protective measures.

##### Electrostatic Charge

Is produced by frictional contact and separation of materials.

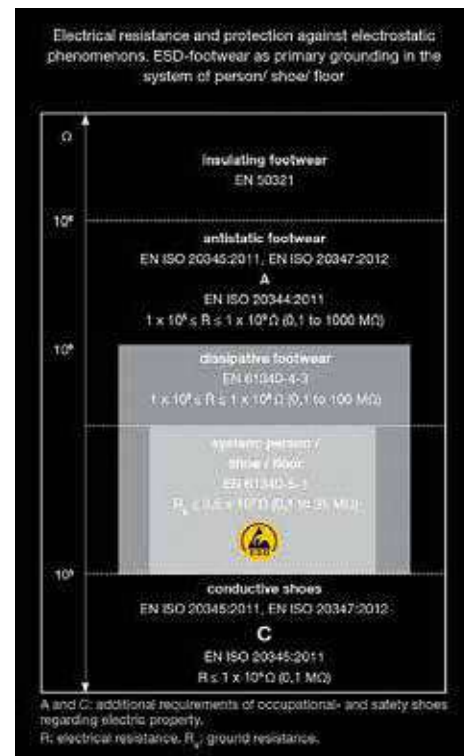

##### Resistance to the ground (R<sub>g</sub>) according to EN 61340

Is the resistance between an electrode on the surface and the grounding point.

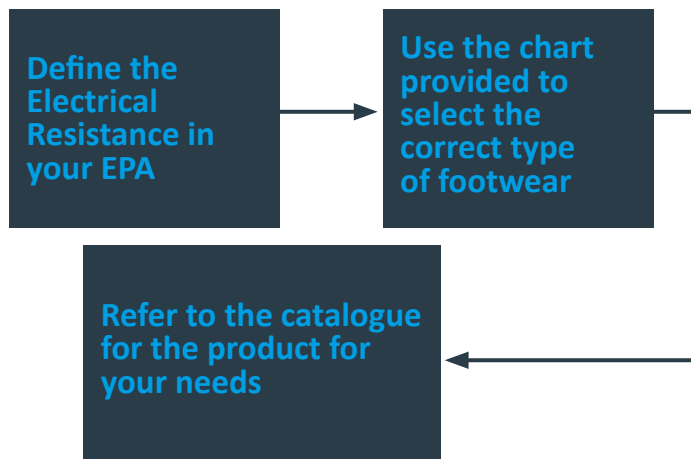

##### Latent Damages

Latent damage is the damage caused by an electrostatic discharge onto an ESDS. This reduces its reliability without causing immediate failure.

### 2. ESD Chart

## STANDARDS EXPLANATION

### Protection against Mechanical Hazards

#### EN388

The EN 388 Standard for protection against mechanical hazards (abrasions, cuts, tears and punctures) has recently changed. In addition to the current cut test carried out for the cut rating there will be another test carried out on a weighted machine, this will measure the force needed to break through the material and is measured on a 6 point grading system (A to F, F being the highest). This allows you to be much more selective with your hand protection solution for cut risks.

- ƒ **Level X:** The test is not applicable or the glove is not tested
- ƒ **Level 0:** Nil performance or result
- ƒ **Level 1:** Minimum result
- ƒ **Level 2:** Good result
- ƒ **Level 3:** Very good result
- ƒ **Level 4 & over:** Excellent result

- 0 to 4: Abrasion Resistance
- 0 to 5: Blade Cut Resistance
- 0 to 4: Tear Resistance
- 0 to 4: Puncture Resistance
- A to F: Weighted Cut

Level	Abrasion	Cut	Tear	Puncture	Level	Weighted Cut
Measurement	Cycles	Cutting Index	Newtons	Newtons	Measurement	Newtons
1	100	1.2	10	20	A	2
2	500	2.5	25	60	B	5
3	2000	5	50	100	C	10
4	8000	10	75	150	D	15
5	N/A	20	N/A	N/A	E	22
					F	30

### Protection against Heat & Fire Hazards

#### EN407

The EN407 standard specifies the general requirements and the thermal performance of gloves to protect from heat and fire. It applies to gloves which protect hands from fire, contact heat, radiating heat, small spray of molten metal or large spray of melting metal.

- ƒ **Level X:** The test is not applicable or the glove is not tested
- ƒ **Level 0:** Nil performance or result
- ƒ **Level 1:** Minimum result
- ƒ **Level 2:** Good result
- ƒ **Level 3:** Very good result
- ƒ **Level 4 & over:** Excellent result

- 0 to 4: Resistance to Flammability
- 0 to 5: Resistance to Contact Heat
- 0 to 4: Resistance to Convective Heat
- 0 to 4: Resistance to Radiating Heat
- 0 to 4: Resistance to Small Melting Metal Spray
- 0 to 4: Resistance to Large Melting

### Determination of Resistance to Water Penetration

#### EN374-2

This is the reference test specified by the European Standard for the assessment of glove quality. Gloves must pass this test in order to prove that they are an effective barrier against liquids and micro-organisms. A statistical sample taken from a batch of gloves is subject to checks for pinholes and leaks by either inflation with air or by filling with water. Performance levels are assessed according to the acceptable quality levels (AQL) of the gloves.

Gloves must meet at least level 2 of EN374-2 to be considered micro-organism resistant and will carry the following chemical pictogram:

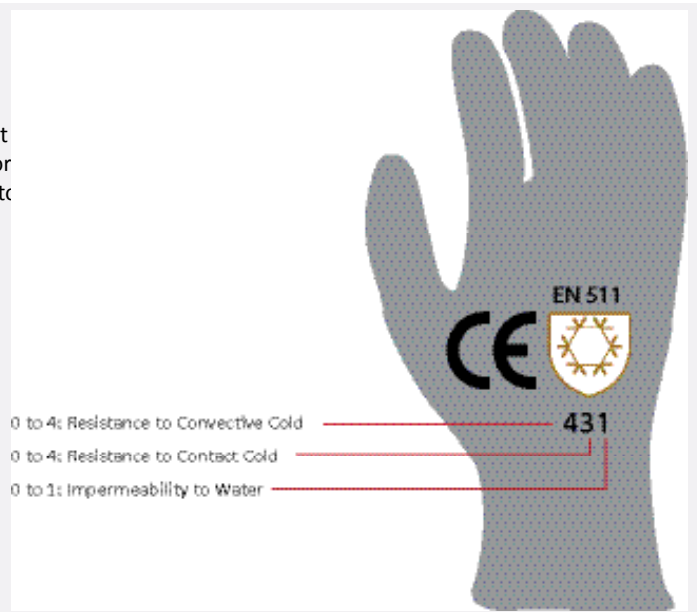

## Protection against Cold

### EN511

The EN511 standard defines the requirements and test methods for gloves which protect against convective or conductive cold down to -50c. This cold can be linked to climatic conditions or industrial activity.

- ƒ **Level X:** The test is not applicable or the glove is not tested
- ƒ **Level 0:** Nil performance or result
- ƒ **Level 1:** Minimum result
- ƒ **Level 2:** Good result
- ƒ **Level 3:** Very good result
- ƒ **Level 4 & over:** Excellent result

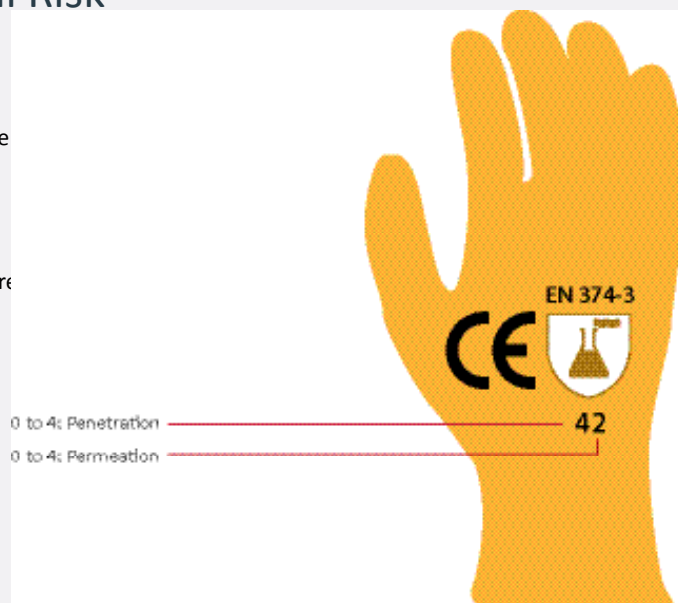

## Protection against Chemical Risk

### EN374-3

The EN374-3 standard involves determination of the resistance of the materials making up the gloves. Resistance to permeation is assessed by measuring the time for a chemical to break through glove material. Air or water is passed through the cell to collect any chemical that has broken through the inside surface of the glove. It is recommended to only use the test results, which have basically relative values, to compare the materials on the basis of the major categories of passage of time.

- ƒ **Level X:** The test is not applicable or the glove is not tested
- ƒ **Level 0:** Nil performance or result
- ƒ **Level 1:** Minimum result
- ƒ **Level 2:** Good result
- ƒ **Level 3:** Very good result
- ƒ **Level 4 & over:** Excellent result

Comfortable shaped nosepiece

Moulded mask shape for optimum comfort and secure seal

High flow exhalation valves for extra air flow are available

## AIRBORNE HAZARDS

### DUSTS

Are airborne solid particles with variable dimensions, which are generated during the crushing process of organic and inorganic solid substances e.g drilling, sawing and sandblasting.

### MISTS

Are tiny liquid droplets that are formed from liquid minerals by atomization and condensation processes such as spray painting.

### FUMES

Are particles forming an airborne suspension, usually caused by the heating of a solid to such an extent that it vapourises and condenses into extremely fine particles. They are generally generated during combustion, fusion or welding processes and may be termed a thermally generated particulate.

### VAPOUR

A gaseous state formed by evaporation from substances that are solid or liquid at room temperature (petrol, methylated spirits).

### GAS

Air-like substance at room temperature such as carbon dioxide, chlorine, ammonia etc.

## ADVANTAGES

PK Safety's respirators are designed with a unique and highly adapted pre-shaped nose area removing the need for an adjustable nose-bridge. This design has proved to be closer fitting and a more comfortable fit ensuring a secure seal during long periods of use.

## HOW TO CHOOSE THE CORRECT MASK

### FFP1

Suitable for lower risk, larger particle dust type i.e. standard demolition, ground works, general site dust, etc.

### FFP2CV

Activated charcoal suitable for nuisance odours and organic vapours.

### VALVED OR NON-VALVED

Exhalation valve helps reduce heat moisture build up and reduces breathing resistance.

### FFP2

Suitable for fine particles i.e. Wood work, demolition, metal dust, powder coating, etc.

### FFP3

Suitable for very fine toxic dust, mists and fumes i.e. Lead, MDF and limited exposure to asbestos etc.

## FACE FIT TESTING

### BOXED PACKAGING

Part No	Qty	Description
50401	1	Fit Test Kit
Test A	10	Bitrex™ Sensitivity Solution
Test B	10	Bitrex™ Test Solution

### Fit Testing Kit Contains:

1x Hood, 1x Bitrex Sensitivity Solution,  
1x Bitrex Test Solution, 2x Nebulisers,  
1x Fit Test Instruction CD

### REGULATIONS

Employers who provide tight fitting face masks must have a fit testing programme in place. The COSHH Regulations and the associated Approved Code of Practice recommend that the initial selection of tight fitting facepieces should include a fit test.

There are two main reasons for doing Bitrex testing:

Firstly to make sure that the respiratory itself is suited for the wearer's particular face shape.

Secondly to make sure that the respirator is fitted correctly to get a tight seal and ensure safety against hazards in the workplace.

### Implementing a robust fit testing programme

The Moldex Fit Test Kit allows employees to take charge of their own Fit Testing Programme thereby reducing costs and enabling them to carry out Fit Testing whenever necessary (new employees, change of RPE etc).

### FIT TESTING KIT

Each kit is suitable for carrying out multiple tests and comes packaged in its own sturdy case. All kits come with a FREE Fit Test CD, to help employers understand more about Fit Testing, the requirements and how to carry out tests.

## RPE: DISPOSABLE FACE MASKS

### SAFETY INFORMATION

#### REGULATIONS

- f The PERSONAL PROTECTIVE EQUIPMENT at work Regulations 1992, regulation 4 requires eye and face protection to be worn in hazardous areas.
- f Regulation 4 stipulates that employers must provide suitable PPE to employees who are exposed to risks associated with their health and safety.

#### Moulded FFP1 Disposable Mask

50109 - FFP1 & 50110 - FFP1V

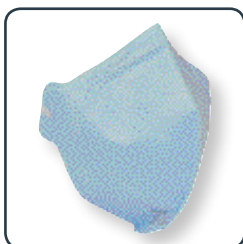

- > Soft Lightweight Fabric
- > Standard: EN 149
- > High Comfort
- > Rating: P1

#### Moulded FFP2 Disposable Mask

50111 - FFP2 & 50112 - FFP2V

- > Soft Lightweight Fabric
- > Standard: EN 149
- > Very Low Breathing Resistance
- > Rating: P1

#### Fold Flat FFP2 Disposable Mask

50119 - FFP2 & 50120 - FFP2V

- > High Comfort Soft Face Seal
- > Standard: EN 149
- > Adjustable Head Strap
- > Rating: P2
- > Colour Coded For Food Industry

#### Fold Flat FFP2V Charcoal Disposable Mask

50121 - FFP2CV

- > High Comfort
- > Standard: EN 149
- > Activated Charcoal Filter For Protection From Odour
- > Rating: P2

#### Moulded FFP3V Disposable Mask

50113 - FFP3V

- > High Comfort Soft Face Seal
- > Standard: EN 149
- > Adjustable Head Strap
- > Rating: P3

#### Fold Flat FFP3V Disposable Face Mask

50122 - FFP3V

- > Soft Foam Comfort Face Seal
- > Standard: EN 149
- > Individually Wrapped
- > Rating: P3

## Moldex Air FFP3V Disposable Face Mask

50107

> A comfortable and durable face mask that has lower breathing resistance for greater comfort

Standard: EN 149 Rating: P3

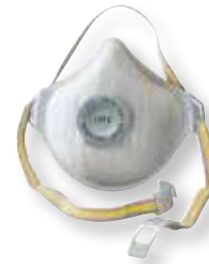

## Moldex Air Plus FFP3V Disposable Face Mask

50106

> Comfortable Face Mask with a washable face seal for enhanced comfort

Standard: EN 149 Rating: P3

## Moldex Classic FFP2 Disposable Face Mask

50104

> Comfortable and Durable Face Mask for a wide range of applications

Standard: EN 149 Rating: P2

## Moldex Smart Solo FFP2V Disposable Face Mask

50114

> Designed for easy donning and doffing for tasks where users have hand protection or limited access etc

Standard: EN 149 Rating: P2

## 3M FFP3 Disposable Face Mask

50135

> Soft Face Seal Face Mask providing superior comfort and protection

Standard: EN 149 Rating: P3

## 3M 7500 Half Face Mask

50214 - Small

50213 - Medium

50212 - Large

> Comfortable & Durable Half Mask

> Comes in 3 sizes for extra versatility

Standard: EN 140:1998

## 3M Particulate Filter

50331

> For use with the 7500 Half Face Mask  
> Protects against Dusts, Mists & Fumes

Standard: EN 143 Rating: P3

## 3M Encapsulated Particulate Filter

50330

> Ideal for use in wet weather conditions

Standard: EN 143 Rating: P3

## Gas and Particulate Compact Reusable Mask

50145

> Combining gas and particulate protection for a convenient and versatile solution for gas protection

Standard: EN 405 Rating: ABEK P3

# HEAD & FACE

## RPE: REUSABLE FACE MASKS

### HAZARD GUIDE

Type	Colour	Application
A		Organic gases and vapours with a boiling point above 65°C
B		Inorganic gases and vapours
E		Acid gases and vapours
K		Ammonia and organic ammonia derivatives
P		P1 80%/p2 95% efficient – dusts and water-based mists P3 99.95% efficient- dusts, oil based mists ,fumes, bacteria
Ax		Organic gases and vapours with boiling point below 65°C
Hg		Mercury vapour

**7000 Lightweight Premium Half Mask**

50207S - Small  
50207M - Medium  
50207L - Large

- > The body of this mask is made from a soft and comfortable Thermoplastic. It is lightweight and low profile making it a comfortable and versatile mask for any task or job. The filters are connected with an EasyLock system that is simple and quick to use
- > Standard: EN 140

**9000 Reusable Full Face**

- 50210
- > PVC Free Thermoplastic Full Face Respirator Providing Excellent Wearer Comfort And Vision
  - > 360grams
  - > Standard: EN 140

### 7000 & 9000 FILTER RANGE

CODE	CLASSIFICATION	COLOURS
FILTER RANGE FOR 50207 & 50210		
50302	A1 PARTICULATE FILTER	
50304	ABEK 1 PARTICULATE FILTER	   
50305	P2 RD PRE FILTER	
50307	P3 RD PRE FILTER	
50300	AX ORGANIC GAS (SINGLE USE)	
50303	ABEK1HgP3RD MERCURY CONDITION FILTER (50 HOURS)	     

**Bucket**

- 50315
- > Air Tight Storage Bucket For Mask's Or Any PPE
  - > Helps Increase Life Of Gas Filters

## DUST HAZARDS

Dust Hazards - Where workers are faced by high volumes of Dusts, Mists and Fumes during carrying out their tasks.

## GASES &amp; VAPOURS

Gases & Vapours – For where gases and vapours are present in the workplace.

## HEARING PROTECTION

### HOW WE HEAR SOUND

Sound waves are channelled towards the ear drum causing it to vibrate. In the inner ear the vibrations are detected by tiny hair cells triggering a nerve impulse. The brain interprets this as sound.

### EXPOSURE TO HIGH LEVELS OF NOISE GREATER THAN 80dB WILL RESULT IN DAMAGE TO YOUR HEARING

**Short Term Exposure** – may cause temporary mild deafness.

**Long Term Exposure** – may result in damage to the hair cells in the ear causing permanent hearing loss.

**Intense Impulse Noise** – may rupture the eardrum or damage the ear bones.

Jet Engine	140dB
Riveting Hammer	130dB
Car Horn	120dB
Pop Concert	110dB
Plate Fabrication Shop	100dB
Milling Machine	85dB
Traffic Noise	80dB
Conversational Speech	70dB
Office	60dB

### NOISE-INDUCED HEARING LOSS

This happens when you have been regularly exposed to damaging levels of noise over a long period of time. The hearing loss will be similar in each ear and will get worse if you continue to be exposed to the noise. Sometimes, you will not notice the effect on your hearing until years after you were exposed to the noise.

### TINNITUS - CAUSED BY NOISE

Sometimes, tinnitus is the first sign that your ear has been damaged by noise. You may get tinnitus before you notice any effect on your hearing. The tinnitus can occur suddenly or very gradually. For some people, it can be temporary, but continued exposure to loud noise may make it permanent.

### NOISE AND THE LAW

The Noise Regulations require you to take specific action at certain action values. These relate to:

- The levels of exposure to noise of your employees averaged over a working day or week; and
- The maximum noise (peak sound pressure) to which employees are exposed in a working day.

#### The values are:

#### Lower exposure action values:

Daily or weekly exposure of 80dB  
Peak sound pressure of 135dB

#### Upper exposure action values:

Daily or weekly exposure of 85dB  
Peak sound pressure of 137dB

#### Exposure limit values:

Daily or weekly exposure of 87dB  
Peak sound pressure of 140dB

#### Lower exposure requirements:

Hearing protection must be available on request

#### Upper exposure requirements:

The provision and wearing of hearing protection is mandatory

#### Exposure limit requirements:

This level should not be exceeded at the ear when wearing hearing protection

There does not seem to be a big difference between the Lower and Upper exposure action levels, just 5dB but this is quite a significant difference. Every 3dB the noise doubles in intensity. Therefore 85dB is more than 2 times as intense as 80dB and 100dB almost 6 times as intense.

## SNR - SINGLE NUMBER RATING

The SNR provides an estimate of the average, overall protection a product will give in a noisy environment. For example if your working environment is about 115dB using hearing protection like the Moldex Spark Plugs with an SNR of 35 will reduce the noise for the wearer to about 80dB, below the legal requirement. The hearing protection provided should give enough protection - aim at least to get below the 85dB at the ear. It can be as important to not over protect as this can prevent the wearer from hearing communications and important warning signals, try not to reduce to below 75dB at the ear.

## Mellows Ear Plug

50501 - Dispenser 250  
30830 - Dispenser Wall Bracket

- > EN 352-1

**Zone 3 Helmet Mounted Ear Defender**

- 50538
- > SNR 32
- > EN 352-1

## EYEWEAR EXPLANATION

### Filter Codes (EN 170)

Code	Type
None	Welding Filter
2	UV Filter, colour recognition may be affected
2C or 3	UV Filter with good colour recognition
4	Infrared filter
5	Sunglare filter without IR specification
6	Sunglare filter with IR specification

### Shades (EN 170)

Shade Number	Shade
1.2	Clear, Amber
1.4	XTP, Blue
1.7	Light Green (Anti-Flash)
2.5	Smoke, Silver Mirror, Blue Mirror
3.1	Dark Smoke
5.0	Dark Green

### Optical Classes (EN 166)

Class Number	Optical Class
1	±0.06 Dioptres – Can be worn at all times
2	±0.12 Dioptres – Should only be worn for occasional use
3	±0.25 Dioptres – Should not be worn for long periods

### Mechanical Resistance (EN 166)

Symbol	Impact Level	Maximum Speed	Types of Eye Protection
A	High Energy Impact	190 m/s	Faceshields
B	Medium Energy Impact	120 m/s	Faceshields/ Goggles
F	Low Energy Impact	45 m/s	Faceshields/ Goggles/Glasses
S	Increased Robustness	5.1 m/s	Glasses (Generally Prescription)

### Optional Requirements (EN 166)

Symbol	Standard
K	Resistance to Surface Damage from Fine Particles
N	Resistance to Lens Fogging
T	Mechanical Resistance at Extreme Temperatures of -5°C to +55°C

### Arm Markings

### Lens Markings

- 50631 - Glasses Cleaner
- 50632 - Spectacle Cord
- 50633 - Glasses Dispenser

## HEAD PROTECTION

PK Safety's hard hats are manufactured and approved to EN397. Available in vented, unvented, long and short peak varieties as well as specific types suited to the mining, construction and forestry industries. Along with an extensive range of replaceable parts and accessories, PK Safety has your requirements covered.

### VENTILATION

Warm air rises. So ventilation holes need to be at the top of the helmet shell to expel hot air where it gathers and to draw in cool air from below. The PK Safety design allows your head to breathe, especially when working outdoors in hot weather for optimum wearer comfort.

### RAIN TROUGH

Large capacity rain trough to prevent water from dripping on users face.

### UV PROTECTION

High quality (UV Resistant) ABS materials are free from material aging due to intensive UV light exposure (i.e. sunlight) Also provides extra impact and penetration protection against normal ABS materials.

## MATERIALS

### POLYCARBONATE

Material used for high temperature requirements. (This material meets EN397 standards).

### POLYPROPYLENE

This is a new generation material specially designed to meet the requirements of EN397. This material has better UV resistance than ABS.

### ABS

Up until now the most commonly known material used for hardhats meeting EN397. Not as highly UV rated as polypropylene.

### UV PROTECTION MATERIAL

All materials are UV Resistant.

## Helmet Accessories

50715 - Sweatband

50716 - Chinstrap

50717 - Visor Post

## PAPER DISPENSERS

Washrooms are not exactly fascinating places. We spend as little time as possible, if any, thinking about them, but it is a room that needs to be fresh and clean. We make this easy with our range of dispensers; catering for a variety of environments from industrial factories to schools and restaurants.

A clean and fresh washroom is worth a lot: Nearly 70% of school children are put off using their school toilets because of their unhygienic conditions.

**DID YOU KNOW?**

The optimum time for effective hand drying is between 7 and 9 seconds.

Drying hands with a paper towel is also quicker and more thorough than the 25 seconds required when using a hot air dryer.

# COMBAT DOUBLE AGENT BACTERICIDAL MULTIPURPOSE CLEANER

A major innovation designed to reduce the risk of disinfectant resistant bacteria. Supplied in two colour-coded formulations, each containing a different disinfection system.

Rotating the two products reduces the risk of bacteria developing resistance to the agents designed to destroy them. Passes BSEN1267 (European Suspension Test). Effective against MRSA, Listeria, salmonella and E.Coli at 20oc after 5 minutes contact time, when diluted. It has also passed the BS5929 (1984) Triangle Tainting Test showing it to be non-tainting to foodstuffs and hence safe to use without rinsing where food is processed.

A versatile, highly effective, non-perfumed, hard surface cleaner. Its high dilution rates, along with its antibacterial properties, make it ideal for application where food is processed, stored or in transit. Can be used manually through pressure washers, floor scrubbing machines or through foaming lances. Suitable for use in hospital wards, nursing homes, catering and kitchen areas, washrooms, or wherever high standards of hygiene are essential.

STERI-7 uses a breakthrough technology called RBT (Residual Barrier Technology) to provide 24/7 protection against bacterial and viral contamination.

STERI-7 kills of pathogens 99.9999% at the point of application and continues to protect by using RBT to form an inert barrier that activates in the presence of moisture.

STERI-7 is Alcohol free.

## CONDITIONS OF SALE

1. Unless otherwise agreed by us in writing these Conditions of sale apply to all sales entered into by us, and these conditions shall override and supersede any Conditions of Purchase stipulated by the Buyer, unless and to the extent that any such Conditions of the Buyer have been specifically agreed in writing by a Partner.
2. In no case shall the property in any goods pass to the Buyer until the price for the same has been paid in full to us. In the event of default by the Buyer in payment of the purchase price in accordance with these Conditions we shall be entitled (without prejudice to any other rights or remedies) to repossess the goods at any time after such default. Where a business ceases to trade and the goods supplied by us have been used or re-sold PK Safety expects the liquidator/receiver to hold funds in reimbursement for such goods.
3. The company will not be liable in law for any arrangements proposed by representatives or staff, relating to supply, delivery, returns or payment and (PK Safety do not guarantee delivery dates and cannot be held responsible for loss of production due to non-delivery of goods) unless they are confirmed in writing within fourteen days signed by a Partner.
4. Prices are those ruling at date of despatch. (Orders valued at £50.00 or under will be charged a carriage charge of £5.00). Delivery by Express Carrier will be charged for at the Carriers current rates.
5. All Quotations given are subject to goods offered being unsold and available at the receipt of order.
6. Claims for damage shortage or non-delivery will not be entertained unless both Carrier and the Firm are advised in writing within three days of date of despatch shown on Delivery Note or invoice. PK Safety do not accept responsibility for the quality of goods supplied although every effort will be made to ensure Manufacturers standards are complied with. Goods returned for credit will be subject to a handling charge of 20% (and all carriages)
7. The Invoice Number and Date must be quoted when returning goods for credit or under complaint.  
  
Goods returned under complaint will be returned to manufacturer for Inspection and Report.
8. Goods returned direct to the firm should be advised by an Advice or Returns Note forwarded under separate cover.
9. The Firm will not be liable for goods returned by any other means unless receipt.  
  
An acknowledgement or credit note will be issued within four weeks from date of return.
10. PAYMENT OF ACCOUNTS is due not later than the end of the month following the date of invoice.
11. The Firm reserves the right to charge interest at the rate of 3% above minimum lending rate of the Bank of England per month on all overdue accounts.
12. All accounts over 60 days, High Court or County Court action will be taken without further notice.

## CLOTHING SIZE CHARTS AND TECHNICAL DATA

### PRE-SHRUNK

Pre-shrunk garments have already been washed which means that the garment will not shrink after additional washes.

### RINGSPUN

Yarn is simultaneously twisted, wound and spun to create a stronger yarn that is softer to the touch.

### G/M2<sup>2</sup>

Grams per Square Metre – this will tell you how heavy the garment is. Eg 250 g/m2

### ANTI-PILL / PILL FREE

This treatment prevents the formation of little balls on the surface of the fabric.

### RIP-STOP

Woven fabric that will not allow a tear to spread.
